

For Control of Barnacle Scale

GRAPEFRUIT

Key Benefits

- **Excellent Barnacle Scale Control:** controls all immature life stages
- **Additional Activity:** effective on soft scales, armored scales, and mealybugs
- **IPM Friendly:** will not harm beneficial insects
- **Excellent Worker Safety:** 12 hour restricted entry interval (REI); minimal PPE

Spray Timings

- Option 1: May:** Apply Centaur to target crawler stages
June: Follow up 30 days later as new crawlers emerge
- Option 2: July to September:** Tank mix Centaur with an adulticide to control overlapping generations

Use Recommendations

- Good coverage is essential; use appropriate water volumes and an adjuvant.
- Use rates: 34.5 oz to 46 oz per acre
- Maximum use rate: 92 oz per growing season
- Preharvest Interval (PHI): 3 days

Resistance Management

- Unique mode of action, IRAC Group 16
- Excellent rotational product

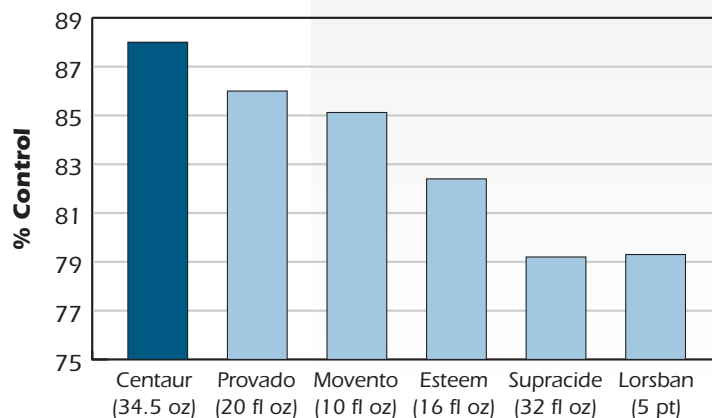

Barnacle Scale Crawlers

Black Sooty Mold on Grapefruit

Barnacle Scale – Grapefruit 51 DAT Weslaco, TX (2012)

Application: 7 May, 2012
