

MONCUT® SC

FUNGICIDE

FOR SUPERIOR CONTROL OF RHIZOCTONIA SOLANI

MONCUT® SC is a liquid formulation fungicide that provides reliable, effective control of soil-borne potato diseases with extended residual activity. The active ingredient in MONCUT SC, flutolanil, provides protection to the seed-piece and tuber set to allow the seed to reach its yield and quality potential, even under the most severe disease pressure situations.

Key Benefits of Using Moncut SC

- Reliable, effective fungicide that provides superior disease management in potatoes while preventing early infection of developing roots
- Extended residual disease control
- Provides both curative and preventative activity which stops disease progress and prevents future infections
- Systemic activity, providing protection throughout the plant and tuber set
- Excellent fit in resistance management program
- Excellent yield and quality results
